README GUIDE

Personal Developer Portfolio · Day 31

Project status

This is a self-directed practice project because the Day 31 screenshot said no official task was published.

Features

Responsive layout, theme toggle, saved theme, mobile menu, project filters, scroll reveal, reading progress, and contact section.

Files

index.html, style.css, script.js, README.md, DEPLOYMENT.md, ROLLBACK.md, netlify.toml, .nojekyll and LinkedIn caption.

Run locally

Extract ZIP, open folder in VS Code and open index.html in browser or use Live Server. No dependencies needed.

Customize

Verify name, education, email, profile links, skill levels and project descriptions. Add real repository/demo URLs only after publishing.

Deploy

Follow DEPLOYMENT.md for GitHub Pages or Netlify. Test the public URL and mobile layout after deployment.

Rollback

Use git revert for a bad shared commit and redeploy. Record actual commit hashes and verification evidence in ROLLBACK.md.

Interview preparation

Explain semantic HTML, CSS Grid/Flexbox, media queries, localStorage, IntersectionObserver and Git revert.

Important

Confirm whether a self-directed project is acceptable before submitting it as internship work.
